

The KWorld Universal TV Tuner and Video Capture Dongle plugs into any available USB 2.0 port for real-time video capture **or** as a TV tuner so you can catch your favorite shows on your PC or notebook.

Don't hassle with installing a PCI card or taking up a precious PCMCIA slot for your video needs. Simply plug the TV tuner dongle into a USB port, then connect your video signal or video device through the S-Video or antenna in.

The included TVR application lets you pause live TV and then return to where you were with the Time-Shifting feature. Or, if you can't make your favorite show, simply set your PC to record it for you.

Convert your favorite videos or family films into AVI or MPEG4/2/1 (including DivX with the proper codec). You also get a Picture-in-Picture in case you need to monitor another station while it's on commercial break.

The TV Tuner/Capture dongle is the perfect inexpensive solution for your video to PC needs. And with a sleek look, small size, and USB connectivity, you won't ever miss your favorite shows again!
